Just Apply This Paste and the Hairs Will Vanish

Boudoir Secrets)

The judicious use of a delatone paste insures any woman a clear, hairiess skin. To prepare the paste, mix a little of the powdered delatone with some water, then apply to the objectionable hairs for 2 or 3 minutes. When the paste is removed, and the skin washed, every trace of hair will have vanished. No pain attends the use of the delatone and it will not mar the most sensitive skin, but to insure results, see that you get real delatone.

London, Aug. 1.—On both wings of the present Russian line of attack General Brussoloff's armies made fur-ther important headway during the last twenty-four hours. As a result, the city of Stanisiau, in southeastern Galicia, converging point of five strat-egic railways, is closely, menaced with envelopment by the Russian left fiank, while the right wing in its advance on Kavel, the great Volhynian railway center, has broken through the Teu-ton first lines on the Kovel-Rohitche sector and is now vigorously pushing the pursuit of the retreating defend-ers.

envelopment by the Russian left flank, while the right wing in its advance on Kavel, the great Volhynian railway center, has broken through the Teuton first lines on the Kovel-Rohitche sector and is now vigorously pushing the pursuit of the retreating defenders.

In the center, too, where Lemberg, capital of Galicia, is the Russian objective, further progress was made by the army of General Sakharoff. On the whole 150-mile front, from the east of Kovel down to the region just south of the Dneister the Germans and Austrians continue on the defensive, stubbornly fighting for every inch of ground.

and Austrians continue on the defensive stubbornly fighting for every inch of ground.

Advance on Stanislau.

The most important progress made by the Russians since the fall last Friday morning of Brody. fifty-eight miles northeast of Lemberz, has been in the direction of Stanislau. The capture of Brody having brought the Russian center on a level with the southern wing, the latter, which had marked time for some weeks, promptly resumed its drive to the northwest and is now smashing forward against Stanislau from the northwest and southwest.

The Austrian official statement says a Russian "wave" was stopped before the Austrian second line east of Tiumacz. This town lies only fourteen miles southeast of Stanislau. Simultaneously with the attack from this direction Russian forces were hurled against the Austrian lines from the northeast and southeast of Stanislau. Simultaneously with sangulnary losses to the attackers, the "Gorground between the attackers the "

similtaneously with the attack from this direction Russian forces were hurled against the Austrian lines from the northeast and southeast of Monasterzyska (west of Buczacz). All attacks in this region were repulsed. Vienna asserts, with sanguinary losses to the attackers, the "foreground being covered with dead and severely wounded Russians."

The official Petrograd report gives no details of the fighting in this area or on the Volhynia and Brody fronts, merely stating that "in the region of Kovel and Brody and also south of the Dneister we continue to advance." The new advance of the two flanks is shown, however, by the Russian afternoon report and the Austrian official statement, the former reporting the breaking of the Teuton first lines in Volhynia while the latter indirectly admilts the growing menace to Stanislau. The Russian advance on this city from the northeast is facilitated by the Buczacz-Stanisiau railway sector, toward which the Russian forces further south are now driving.

A statement issued by the German war office reports the recapture by the Germans and Austrians of a small sallent on the Stokhod. A belated Austrian official report says the Teutons regained "a considerable part" of the territory loss Friday southeast of Kovel. Since then, however, the Russians have broken the defenders new line in that region.
